

The history of OJSC "Tatchempharmpreparaty"

Open Joint Stock Company "Tatchempharmpreparaty" is one of the largest manufacturers of pharmaceuticals and surgical suture materials in Russian Federation and the only producer of surgical gut (catgut).

The history of OJSC "Tatchempharmpreparaty" originates from a small company established in the end of 19th century by pharmacist Ferdinand Grahe. He has founded industrial laboratory of the central pharmacy stock which was transformed into pharmaceutical factory in 1931. At the same time the surgical gut factory was built to produce suture materials. These days OJSC "Tatchempharmpreparaty" represents a highly developed industrial complex with the production capacity of more than 400 million packages of medications and 12 million running meters of surgical suture materials per year (made from more than 100 types of materials including catgut, silk, polypropylene, polycapromamide, polyglycolide, polydioxanone, etc.). All types of surgical sutures are accompanied by atraumatic needles varying in curvature, length, and diameter.

**OJSC
"TATCHEMPHARM
PREPARATY"**

The main goal of OJSC "Tatchempharmpreparaty" is to manufacture and sell the highest quality products which satisfy the requirements and expectations of our customers.

OJSC "Tatchempharmpreparaty" produces more than 100 items of medications in form of tablets, tinctures, ointments, syrups, solutions and pastes of various types of pharmacotherapeutic groups (analgesics, cardiovascular, gastrointestinal, infectious diseases, ophthalmology, etc.). Our company is the leading producer of ophthalmic ointments in Russian Federation.

In the company we rely on the results of up to date research and development in pharmaceutical sciences. Strict regulations are applied to control the quality of all the products.

Our manufacturing facilities are built according to international GMP standards. The quality of our products is acknowledged by a number of national and international awards. We were the first pharmaceutical manufacturer in Russian Federation to introduce ISO 9001:2000 quality management system in 2001. Later in 2010 we were certified according to ISO 9001:2008.

In order to guarantee the highest quality of our products the new production line was established for manufacturing of tableted pharmaceuticals according to GMP standards. The manufacturing capacity is 1,5 billion tablets per year.

OJSC "Tatchempharmpreparaty" is expanding the range of the products by augmenting highly active preparations – generics; medications to treat cardiovascular and ophthalmological diseases, disorders of gastrointestinal tract, etc.

We also produce our own original pharmaceuticals such as:

- **Befungin™** - natural drug based on the birch fungus used as restorative remedy to treat gastrointestinal disorders and cancer
- **Cofetamine™** - migraine treatment
- **Mebikar™** - day-time sedative
- **Glycifone™** - anticancer treatment
- **Dimephosphone™** - regulator of metabolism
- **Microiodide™** - prevention of iodine-deficiency
- **Taspir™** - sparkling tablets of acetylsalicylic acid
- **Xymedone™** - anti-burn remedy of immune action
- Others

Our separate direction of activities of is to provide services in licensed and contract manufacturing of pharmaceutical products. This includes development of formulation, manufacturing process and packaging. We also provide assistance in certification of products according to the requirements of Russian Federation.

For the future we aim to increase the production volume, introduce modern manufacturing facilities and eventually contribute to development of the society.
